

How to Upload a Video to Firehoze

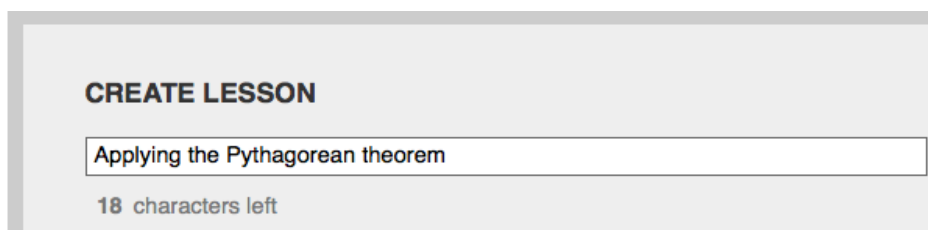

1. Sign into your Firehoze account. http://beta.firehoze.com/user_session/new
2. On the Home page, click on Create Lesson.

3. If you have not already signed up to be a Firehoze instructor, you will be prompted to do so.

If you have signed up to be a Firehoze instructor, give your lesson an appropriate title so viewers can find you.

4. Under Synopsis, provide a brief lesson description

Synopsis

500 characters left

This lesson walks through different examples of how to use and apply the Pythagorean theorem.

5. Use your Notes section to provide extend notes, explanations, additional resources or anything else you think would help your viewers.

Notes

(Format using ***bold*** and *_italics_* text)

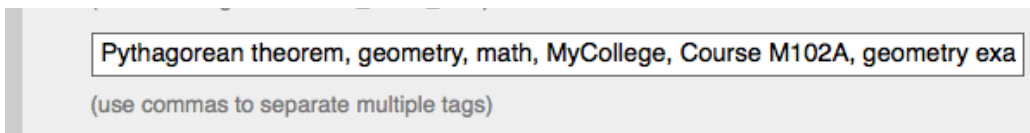

In any right triangle, the area of the square whose side is the hypotenuse (the side opposite the right angle) is equal to the sum of the areas of the squares whose sides are the two legs (the two sides that meet at a right angle).

This equation provides a simple relation among the three sides of a right triangle so that if the lengths of any two sides are known, the length of the third side can be found.

A generalization of this theorem is the law of cosines, which allows the computation of the length of the third side of any triangle, given the lengths of

6. Tag your video to ensure your lesson is found! The better your tags, the more easily you will come up in search results.
