

Microphone Settings for Windows XP

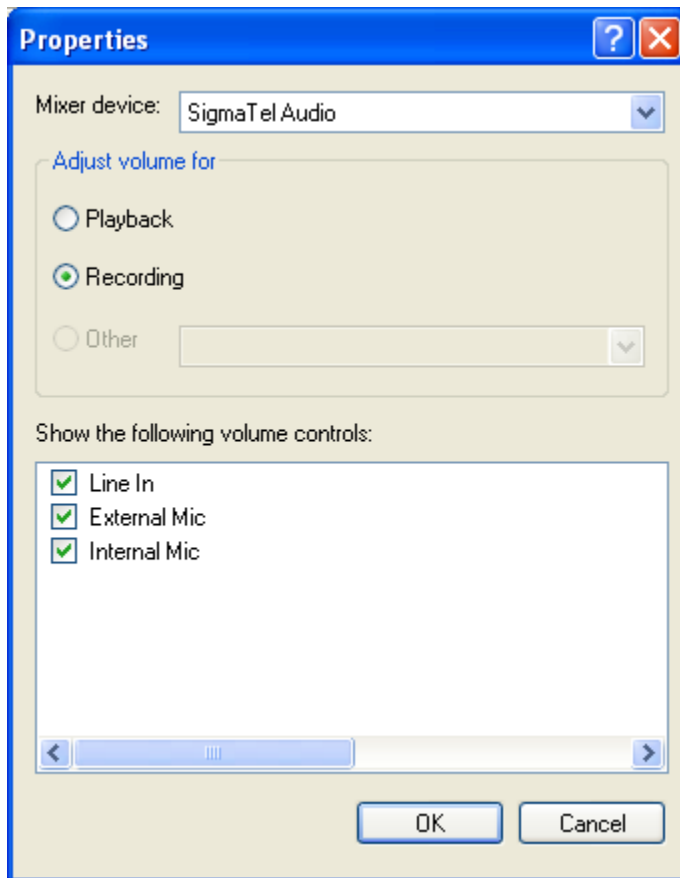

1.) Double click left mouse button on “speaker” icon to open the Volume Control

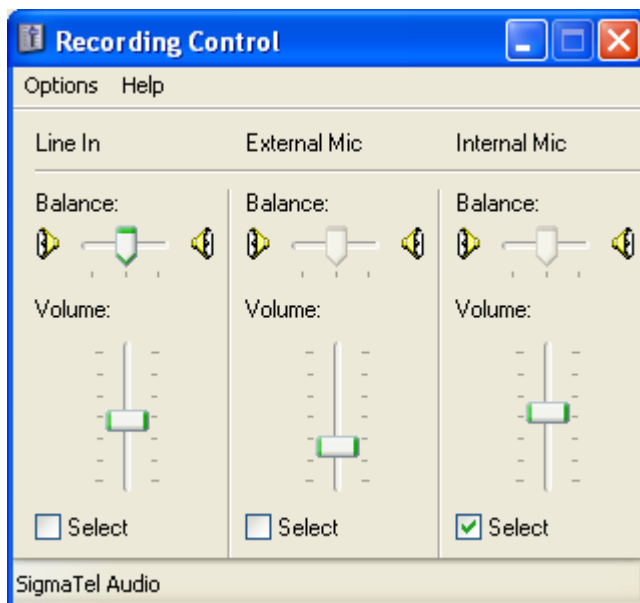

2.) Select Options-> Properties from the Volume Control dialog

3.) Select "Recording" on the Properties: check Line In, External Mic and Internal Mic then select "OK"

4.) If you choose to use your built-in microphone then select "Internal Mic" and increase the volume as necessary. Select "External Mic" if you have an external microphone.

5.) Select Options->Advanced Controls from the Recording Control menu then select “Advanced” on the Internal Mic or External Mic based on your setup.

6.) Select “Microphone Boost” on the Advanced Controls for Internal Mic
